

VIJAYA SIMHA

Senior Software Engineer | Azure AI Foundry | Java/Spring Boot | Agentic AI | Cloud Platforms | Gaming Systems

Redmond, WA | 410-858-2034 | pvijaysimha@gmail.com | LinkedIn: <https://www.linkedin.com/in/pvijaysimha/>

PROFESSIONAL SUMMARY

Senior Software Engineer and technical leader with 18+ years of experience building production backend services, cloud platforms, gaming systems, developer productivity tooling, and AI-powered automation. Current Microsoft engineer with hands-on experience in Azure AI Foundry, Copilot Studio, OpenAI/LLMs, RAG, LangChain, Azure AI Search, AKS, Azure DevOps, C#.NET, Java, Spring Boot, Kafka, AWS, Docker, Kubernetes, CI/CD, and API platform engineering. Strong fit for Azure AI Engineer, Java Backend Engineer, Agentic AI Engineer, Platform Engineer, and Gaming Backend Engineer roles.

TECHNICAL SKILLS

AI / GenAI: Azure AI Foundry, Copilot Studio, Azure AI Search, OpenAI, LLMs, RAG, LangChain, Prompt Engineering, AI Agents, Tool/Function Calling, AI Orchestration, Synthetic Data, Azure ML, MLOps

Backend / Languages: Java, Spring Boot, C#, .NET, Python, JavaScript, Node.js, ExpressJS, NestJS, REST APIs, Microservices, Distributed Systems, System Design, SQL

Cloud / DevOps / Data: Azure, AKS, Azure DevOps, AWS, Docker, Kubernetes, Jenkins, CI/CD, IaC, Kafka, MySQL, PostgreSQL, SQL Server, MongoDB, Grafana, Prometheus, Kibana

Gaming / Frontend: PhaserJS, SmartFoxServer, Java Swing, JavaFX, Angular, ReactJS, JSP, jQuery, multiplayer systems, game operations, reporting platforms

SELECTED IMPACT

- Built Microsoft AI-powered workflow automation with Azure AI Foundry and Copilot Studio, improving business process efficiency by 30%.
- Reduced Azure onboarding from 7 days to 1 hour through self-service provisioning, RBAC automation, and infrastructure-as-code workflows.
- Improved internal data access speed by 40% by building a centralized high-availability API platform on C#.NET and AKS.
- Led Java/Spring Boot, Kafka, MySQL, AWS, Docker, and Grafana delivery for gaming platforms, improving engagement by 20% and reducing downtime by 25%.
- Optimized multiplayer backend services supporting more than 100,000 concurrent users and improved response times by 30%.

PROFESSIONAL EXPERIENCE

Microsoft | Senior Software Engineer | Redmond, WA | Jul 2025 - Present

- Architected and integrated Azure AI Foundry and Copilot Studio to deploy custom AI agents that automate cross-application workflows.
- Designed AI-powered workflow automation using LLM capabilities, enterprise data grounding, API integrations, and platform services.
- Built a centralized API platform using C#.NET and Azure Kubernetes Service, simplifying data access and integrations across internal applications.
- Developed self-service Azure onboarding with dynamic resource provisioning, RBAC configuration, CI/CD, and infrastructure automation.
- Established Azure DevOps pipelines for application and infrastructure deployment, reducing deployment time by 50% and improving testing efficiency by 35%.

Remarkable Software Services LLP | Technical Lead - Systems Architecture | Hyderabad, India | Apr 2024 - Jun 2025

- Led a 12-engineer team building a cognitive and edutainment gaming platform using Spring Boot, Kafka, MySQL, PhaserJS, SmartFoxServer, Docker, AWS, and Grafana.
- Designed REST APIs, authentication, game progress tracking, reporting modules, asynchronous messaging, and production monitoring for scalable platform operations.
- Integrated Kafka and Grafana to improve real-time visibility and reduce downtime; managed AWS deployments, CI/CD workflows, load testing, and post-launch optimization.
- Mentored frontend, backend, and database engineers through architecture reviews, implementation planning, code quality practices, and agile delivery.

Straight Software Solutions Pvt Ltd | Technical Lead | Hyderabad, India | Oct 2021 - Mar 2024

- Led backend engineering for a multiplayer gaming product, optimizing Spring Boot and MySQL services for high-concurrency usage and faster response times.
- Delivered Java/Spring Boot APIs, Angular and React features, AWS deployments, Jenkins pipelines, debugging, testing, and production readiness support.
- Worked directly with clients on requirements, enhancements, support, technical design, delivery planning, and release coordination.

Remarkable Software Services LLP | Technical Lead - Application Engineering | Hyderabad, India | Oct 2014 - Sep 2021

- Managed admin, reporting, game management, affiliate management, point transaction, and game history applications for gaming platform operations.
- Built and maintained backend services and web applications using Java, Spring Boot, Struts, JSP, jQuery, SQL Server, MySQL, Angular, ReactJS, Kafka, and SmartFoxServer.
- Coordinated requirements analysis, implementation, testing, deployment, stakeholder communication, and support across multiple product releases.

Earlier Java Engineering Roles | Senior Java Developer / Java Programmer / Software Consultant | India and Australia | Aug 2005 - Sep 2014

- Delivered enterprise, financial, reporting, and game client systems using Java, JavaFX, Java Swing, GWT, Struts, Servlets, Oracle, PL/SQL, SQL Server, MySQL, JDBC, JSP, and jQuery.

- Built AML transaction monitoring modules, suspicious alert workflows, database procedures, TCP/IP game client functionality, internal tools, UAT support, and production releases.

SELECTED AI AND PLATFORM PROJECTS

- Retrieval-Augmented Generation: Designed a RAG architecture using LangChain and LLM integration for enterprise search and question-answering use cases.
- Azure AI Search and OpenAI Chatbot: Built a conversational AI solution grounded in proprietary business data to improve automated support quality.
- Synthetic Data Generation: Developed an LLM-based pipeline for privacy-conscious model training and experimentation workflows.
- Azure ML and MLOps: Architected an end-to-end predictive ML workflow with deployment and operational practices.

CERTIFICATIONS AND EDUCATION

AWS Certified Solutions Architect - Associate | Oracle Certified Java 8 Associate | Certified Scrum Master | B.Tech, Sri Venkateswara University
